

How to submit with social submitter.

For successful submit you need proceed following steps.

1. Prepare User Accounts on the «Users» tab.

For each site you need login and password. Or you can load prepared accounts using «Load Users»

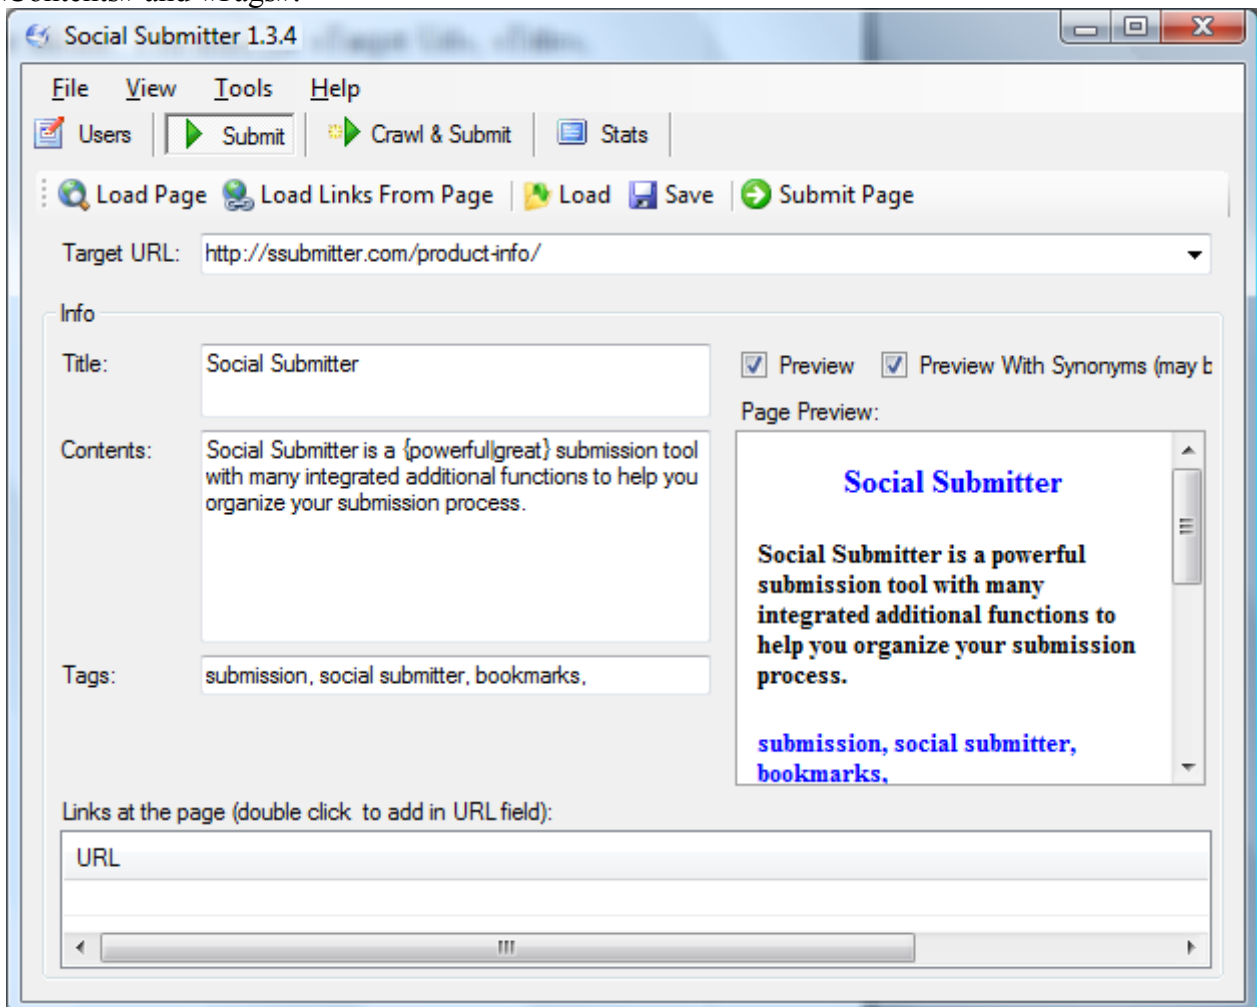

Then you need to test you accounts using «Test» button or «Test All Sites» button.

2. Prepare or load article to submit on Submit tab.

On the submit tab you need to prepare text for submit. You must fill «Target Url», «Title», «Contents» and «Tags».

If you submit one article using various user accounts, you can save article using «Save» button

And then when you will use another user account you can load article by «Load» button

You can synonymize text in «Title» and «Contents» - read «[HowToSynonymize](#)», you can use proxy during submit - read «[HowToUseProxy](#)», and create .bat files to cron your submit - read «[HowToBatSubmit](#)»

When the article is prepared you can press «Submit Page» button to start submit.
